Skills

Coding: HTML, CSS, Git, JavaScript, NodeJS, Express.js, MySQL, Sequelize, OOP, MongoDB, Mongoose, JQuery

Other: Experience in customer-facing technical roles, experienced international work traveler, Specialized in DSP and control systems in Undergrad

Experience

Spectra Logic / Engineering Test Specialist

MARCH 2016 - JULY 2021, Boulder, CO

Created tests, specializing in the company's flagship product. Designed and implemented both low and high-level test plans covering robotic tape products. Managed large databases of existing test plans. Regularly lead sessions educating coworkers on upcoming features introduced into the tape library software to prepare them for testing. Executed tests to fully vet new code.

Spectra Logic / Field Application Engineer

JUNE 2013 - MARCH 2016, Boulder, CO

Traveled extensively throughout the US and around the world to customer sites performing installation and support of large-scale data storage systems. Specialized in the onsite construction of Spectra's flagship robotic tape library. Led teams in the multi-day build and setup process for the libraries. Provided onsite support for high-sensitivity customers. Was the main onsite contact for and lead over 40 installations for the company's largest customer, installing exabytes of capacity.

Education

University of Denver / Full Stack Web Dev Bootcamp

MAY-AUGUST 2023, DENVER, CO

University of Colorado at Boulder / Electrical Engineering

AUGUST 2009 - MAY 2013, BOULDER, CO

Qualifications

Passed the NCEES Fundamentals of Engineering test for electrical engineering in January 2019 (EI.0075933)

Personal

From June of 2022 through January of 2023, I lived in Tokyo on a student visa learning Japanese while tourist visas were still forbidden from entering. I enjoy hiking, mountain biking, skiing, and camping with friends, and I love learning new things from all sorts of different subjects.
